Summary

Trilingual Senior iOS Engineer with over 10 years of experience building scalable, high-performance applications for Apple platforms. Proven track record in leading cross-functional teams and delivering first-to-market features. Expert in SwiftUI, UIKit, and modular architectures, with a secondary background in full-stack web development.

Key Achievements

- **Verify With Apple Wallet (First outside US):** Led iOS client-side implementation for Japan's first commercial deployment of Apple's identity verification API at Mercari, establishing the company as a global early adopter.
- **Revenue Growth:** Delivered an 8% revenue increase for GOKKO Inc. through strategic implementation of search features and A/B testing optimization.
- **Enterprise Scale:** Developed an expense billing system from scratch used by 3,000+ employees, integrating web clients, APIs, and native iOS applications.

Experience

iOS Lead, AI/LLM Team, Mercari Inc. – Tokyo, JP Jan 2022 – present

Biggest C2C marketplace in Japan (22M MAU); promoted from Senior iOS Engineer (Fintech/Merpay) to iOS Lead on the AI/LLM team in Apr 2026.

- **AI/LLM:** Leading product-facing AI/LLM feature development across the Mercari app
- **eKYC:** Led the client-side implementation of Verify With Apple Wallet, the first commercial deployment of Apple's ID verification API outside the United States, coordinating with backend, design, and product stakeholders
- **Credit (Fintech):** Led migration of 50+ legacy UIKit screens to SwiftUI, improving developer velocity and code maintainability across the fintech codebase
- **Cross-domain:** Led a 6-person team developing 2 fintech SDKs consumed by multiple Mercari Group apps
- **Cross-domain:** Spearheaded E2E test automation initiatives, significantly increasing release stability and performance benchmarking across large modular codebases
- **Cross-domain:** Mentoring junior engineers and cross-domain hires to strengthen the mobile engineering culture

Contract iOS Engineer, GOKKO Inc. – Tokyo, JP Sept 2025 – Jan 2026

SwiftUI iOS app built on The Composable Architecture (TCA).

- Implemented a comprehensive search feature for the Popcorn short-video streaming platform, resulting in an 8% lift in revenue validated through A/B experimentation

Contract iOS/tvOS Engineer, EXARING AG – Munich, DE Mar 2025 – Apr 2025

- Developed features for the waipu.tv streaming platform client across iOS and tvOS
- Designed and shipped an improved home screen widget, increasing app re-engagement rates

- iOS Engineer / Full-Stack Web Engineer**, DISCO Corporation – Tokyo, JP Sept 2014 – Dec 2021
Semiconductor equipment manufacturer; Apple Enterprise program apps for global user base.
- Designed and developed native apps and SDKs for Apple platforms (iOS, iPadOS, macOS) under the Apple Enterprise program
 - Built a custom indoor positioning system utilizing iBeacon BLE devices and CoreLocation
 - Established CI/CD pipelines using GitLab CI and Fastlane, reducing manual deployment time by 60%
 - Developed a fully customized internal iOS keyboard and binary xcframeworks distributed via Swift Package Manager
 - As a Full-Stack Engineer, developed an entire expense billing system for 3,000+ employees from scratch (Web, APIs, and iOS)

Technical Skills

Platforms: iOS, iPadOS, macOS, tvOS, watchOS

Swift Stack: SwiftUI, UIKit, Async/Await, Combine, Intents, WidgetKit

Architecture: TCA, Modular Codebases, MVVM-C, Clean Architecture, ...

Infrastructure: Tuist, Bazel, Fastlane, Xcode Cloud, Docker, Git

AI / Agentic Coding: Claude Code, Codex, Spec-Driven Development (SDD)

Web/Backend: PHP (Laravel), JavaScript (Node, Vue), SQL, RESTful APIs

Languages: Japanese (Fluent, JLPT N1), English (Fluent), German (Native)

Education

Ludwig Maximilians University, Munich, M.A. in Computer Sciences & Japanese Sciences Oct 2007 – Mar 2014
• Grade: 1.55 (German scale, top ~10%)

Surugadai University, Foreign Exchange Studies – Saitama, JP Apr 2010 – Mar 2011
